

# MicrobiotaMi 2018

5th – 7th November 2018  
Milan, Italy

University of Milano-Bicocca  
Aula L. Sironi, Building U4  
Piazza della Scienza, 4  
20126 Milan

Organized in the frame of the EU-funded Marie Skłodowska-Curie-ETN project TOLLerant ([www.tollerant.eu](http://www.tollerant.eu)) the international congress “MicrobiotaMi 2018” will gather in Milano top world scientists and early stage researchers providing a multidisciplinary, young, creative and stimulating environment.

The meeting will focus on the molecular mechanisms and interactions in health and disease conditions beyond infection, including sensitization, gut-brain communication, aging, cancer, chronic inflammation and autoimmunity.

Young researchers have a special discount on registration fee. They are strongly encouraged to communicate their recent results through posters, oral and flash communications.

## 3 main sessions

### Microbiota/host interaction

innate sensing, gut-brain axis, inflammaging

### Microbiota in nutrition and health

### Microbiota and diseases

inflammation, neurodegeneration, autoimmunity

### Confirmed plenary speakers

**Scott Snapper** – Harvard, USA – Director, Inflammatory Bowel Disease Center and Professor of Medicine, Harvard Medical School

**Judith Campisi** – Buck Institute, CA USA – Professor

**Gabriel Nunez** – Department of Pathology Michigan Medicine University of Michigan, USA – Co-Director, Immunology and Host Response Program Experimental Pathology

**Maria Rescigno** – Humanitas University, Milano, Italy – Group Leader Mucosal immunology and microbiota Unit

**Duccio Cavalieri** – University of Firenze, Italy – Professor

**Jin-ichi Inokuchi** – Tohoku Pharmaceutical University, Japan – Professor

**Hiroshi Kiyono** – University of Tokyo, Japan – Head of Division of Mucosal Immunology

**Jerry M. Wells** – The University of Wageningen, The Netherlands – Chair of the Host-Microbe Interactions Group

Registration is OPEN
