2020 MicrobiotaMi

Humanitas Congress Center
Milan, February 5/7, 2020

Plenary Speakers

-  **Yasmine Belkaid**
National Institute of Allergy and Infectious Diseases (NIAID), USA
-  **Patrice Cani**
Catholic University of Leuven, UCLouvain, Belgium
-  **Ernst Holler**
Charité University Hospital of Berlin, Germany
-  **Alexander Khoruts**
University of Minnesota, MN, USA
-  **Paul O'Toole**
University College of Cork, Ireland
-  **Eric Pamer**
Duchossois Family Institute: Harnessing the Microbiome and Immunity for Human Health, University of Chicago, IL, USA
-  **Manuela Raffatellu**
Center for Microbiome Innovation, University of California, San Diego (UCSD), CA, USA
-  **Nicola Segata**
Center for Integrative Biology, University of Trento, Italy
-  **Karen Sfanos**
Johns Hopkins University School of Medicine, MD, USA

After the success of our first edition, we are pleased to announce **MicrobiotaMI 2020**: three days of scientific sessions and multidisciplinary networking at the brand new **Humanitas Congress Center in Milan 5th-7th February 2020**.

Researchers in the broad field of microbiota, from bench to bedside, and companies will meet in Milano to share their knowledge and to create new collaborations and technology transfer opportunities.

The program is divided into **four core sessions**:

1. Gut-liver-brain axis

2. Gut-bone marrow axis

3. Mucosal microbiota in genito-urinary and respiratory systems

4. Gut microbiota and the immune system: from allergies to cancer

In each of these sessions, presentations will be made by leading immunologists and clinicians who will give **keynote lectures** on state of the art advancements in differing areas of the same microbiome field.

A **final round table** for each session will discuss future developments in that area, encouraging contributions from the audience.

MicrobiotaMi is characterized by a **multidisciplinary approach**, an outstanding scientific level, and a large active participation of young, early stage researchers. We anticipate the attendance of researchers from academia, clinical departments as well as biotech and pharma industries who are interested in the molecular, immunological and translational aspects of microbiota.

We look forward to seeing you at this exciting meeting in a stimulating interdisciplinary environment favored by the intercultural, young, creative, and fascinating city of Milano.

Chairs

Nicasio Mancini

San Raffaele University,
Milan

Francesco Peri

University of
Milano-Bicocca, Milan

Maria Rescigno
