Università Vita-Salute
San Raffaele, Milan

Francesco Peri

University of Milano-Bicocca,
Milan

Maria Rescigno

Humanitas University,
Rozzano, Milan

Presentation

Interdisciplinarity has to be the evolving key of modern medicine and it is absolutely pivotal in the microbiome field, one of the hottest topic in medical research. A close interplay between basic and translational research is indispensable for a better comprehension of the discrete multifaceted roles play by the resident flora on human health. This approach is evident in the seven sessions of the MicrobiotaMI 2023 congress, gathering main experts from top research centers all over the world featuring both basic research and clinical backgrounds.

After the limitations due to the COVID-19 pandemic, we believe that MicrobiotaMI 2023 is the right occasion to safely meet this approach "in person".

Abstract

During the Congress there will be sessions of Oral Communications and Posters with topics related to the Congress.

Abstracts will be reviewed by the Scientific Committee and may be selected for either **oral or poster presentation**.

Authors who wish to present scientific works are requested to send abstracts by **February 25th, 2023** using ONLY the online form on **www.microbiotami.com**.

Authors must specify their preferred form of presentation (oral communication or poster) when sending their abstracts. The choice is not binding.

Topics for Abstract

- Microbiota profiling and nutrition
- Microbiota profiling and response to viral infections
- Microbiota profiling and cancer
- Microbiota profiling and systemic effects
- Microbiota profiling and behavioural changes
- Microbiota profiling and antimicrobial resistance
- Microbiota profiling and pharmacological interference

Call for Abstract

Deadline for abstract submission

FEBRUARY 25th, 2023

Notification of acceptance of abstracts

MARCH 5th, 2023
